JUICEHUB™
40W 8A 5 Port Desktop Charger

MANUAL   **VER 1.1**

40W DESKTOP CHARGER

Our all in one solution to your charging needs; a simple 5 Port Smart IC Charging Unit, which is designed to deliver the optimum charging speeds of all devices connected through host negotiation. This simply means that instead of swapping chargers for various devices, or finding that your iPad is suddenly charging at half the normal rate, because you only have a generic 5V~1Amp charger with you, this unique charger will adapt specifically to whatever device you connect delivering optimum charging speeds with its large 8 Amp overall power.

PACK CONTENTS

• JuicEBitz® JuicEHub™ 5-Port Charger
• 1.5m / 5ft Power Cord

FEATURES

• Smart IC Technology: Maximum charge; minimum wait time.
• 5 Ports: Each port is unmarked, so any device can be connected to any port, all running at 5V output and able to deliver up to 2.4A per port.
• Conveniently sized: Only 160g, this small compact charger can be placed anywhere without being unsightly and is great for travel purposes.

POWER DELIVERY SPECIFICATIONS

Input: AC 100-240V 1.1A

Total Max Output: 5V~8A

Max Port Output: 5V~2.4A

> " Smart IC Technology is the fastest, most innovative power delivery around. No more swapping chargers, ports or other power accessories; a one size fits all solution to over ever growing technological lifestyles... "

FULL TECHNICAL SPECIFICATIONS

• Input: AC 100-240V 50/60Hz 1.1A Max

• Output: 5V 8000ma (40W)

• Smart IC (Intelligent Charging): Max 2.4A Per Port.

• Protection: Over Voltage; Over Current; Short Circuit

• Certificates: CE, FCC, ROHS

• UK Mains Cable (Fused): BS 1363 Safety Approved UK 3 Pin

• Power Cord Length: 5ft / 150cm

• Ports: 5 x USB 4 Pin AF

• Size: 90mm*58mm*27mm

• Unit Weight: 160g

• Boxed Weight with 3 Pin UK Mains Cable: 360g

• Colour: Black/Red

• Model Number: DL-AC0111

• EAN: 5060392141984

WARRANTY

Our company provides all customers with a 2 Year Warranty as standard from date of purchase.
(Please retain your receipt),

FAQ & HARDWARE RESET

1. What port should I use to charge my device?
Due to its Smart IC Technology, each USB Port will automatically adapt to the device connected, so it doesn't matter which one you use.

2. My device only uses a 1A charger normally, will this high powered one be safe to use?
Yes, it will supply the correct amount of charge to your device, if it only negotiates at 1A it will adapt accordingly. If it is capable of charging any higher up to 2.4A, it will utilize this to charge as fast as possible.

3. One of the ports is not working - what should I do?
Because the ports are constantly swapping information, sometimes they can get locked out.
i)   Simply remove the power cord and all USB cables and devices from the unit and leave it for 5 minutes.
ii) Reconnect your power cable and it will have reset itself again.
iii) Connect your USB cable and it will have reset itself again – you should be able to charge as normal.

4. What speed will it charge my device at?
Because each device has different programming it will depend on what it is set to run at and other factors such as the cable and what programs are running can make this vary from one user to another.
For optimum charging it is advised to close all applications that are not required and lock the screen, this then initiates 'direct charging' as opposed to 'downstream charging'.

5. Can I use this in other countries apart from the UK?
Yes, it has an input range of 100-240V, so can be used with travel adapters and in all countries that have AC Power, between these ranges.
