

# JUICEBRICK™

## 15W 2 PORT MAINS CHARGER

### INSTRUCTION MANUAL V2.0

## SPECIFICATIONS

### PRODUCT FEATURES

- Input: AC 100-240V 50/60Hz 0.4A
- Output: 5V/3.1A (15W) Overall
- Smart IC Output Per Port: 5V/2.4A (Max)
- Model Number: KYT05003100BB | JUICEBRICK20
- Dimensions: 73mm x 48mm x 30mm
- AC Adapter Style: UK 3 Pin Plug
- Protection: Over Voltage; Over Current; Short Circuit
- Unit Weight: 150 g
- Smart IC Technology – determines the optimum charging speed for all other devices, e.g. iPhone, iPad, iPod and non-Quick Charge compatible products which is a universal way of charging all mobile phones and tablets, digital cameras and satellite navigation systems.

### INSTRUCTIONS & CARE OF YOUR PRODUCT

- For internal use only, keep away from fire, water and any other hazard.
- Do not insert anything inside the ports to the device. This is a sealed unit and the fuse cannot be replaced.
- Warranty 2 Years.
- Connect the device you wish to charge with a USB cable into the required port – you can charge up to two devices at the same time – charging will commence instantly.

### RECYCLING ELECTRICAL PRODUCTS

You should now recycle your waste electrical goods and in doing so, help the environment.

The recycling bin symbol means an electrical product should not be disposed of with normal household waste. Please ensure, that should the need arise that it is taken to a suitable facility for disposal. Visit [www.recycle-more.co.uk](http://www.recycle-more.co.uk) click on 'bank locator' and enter your postcode to find your nearest recycling centre.

## OPERATING INSTRUCTIONS

### SIMPLE CHARGING TECHNOLOGY

Simply connect your device and start charging straight away without switches.

## HARDWARE RESET

If any of the ports are not working, please complete the following steps to reset the device:

- 1) Remove the charger from the power source and then all USB cables from the device
- 2) *Leave for 2 minutes*
- 3) Reconnect the charger to the power source without any cables attached
- 4) *Leave for 2 minutes*
- 5) Now reconnect your cables and charge as normal – the PCB should be reset.

If you are still experiencing problems, then please call or email us for further assistance.
